Priya Raman

• AI/ML Engineer – NLP, Retrieval■Augmented Generation, Computer Vision, MLOps**

■ Remote • ■ priya.raman@email.com • ■ +1■555■012■3456 • **Hourly Rate:** $65

•

Summary

Results■driven AI/ML engineer with 6 years of freelance experience building production■grade NLP, RAG, and computer■vision systems for healthcare, real■estate, and e■commerce clients. Expert at translating research prototypes into scalable pipelines using Docker, Kubernetes, and CI/CD (GitHub Actions, Argo). Proven track record of cutting manual effort by 60■80 % and boosting key business metrics (CTR, latency, false■positive rates). Strong communicator who partners with product, data, and DevOps teams to deliver end■to■end solutions on time and within budget.

•

Skills

| **Machine■Learning & NLP** | **Computer Vision** | **MLOps & Deployment** |

|---|---|---|

| • Transformers (BERT, RoBERTa, T5) | • CNNs (ResNet, EfficientNet) | • Docker, Kubernetes |

| • Retrieval■Augmented Generation (FAISS, Milvus) | • Object detection (YOLOv5) | • CI/CD (GitHub Actions, Argo) |

| • Text summarization, classification, semantic search | • Image classification, quality assurance | • Model serving (FastAPI, TorchServe) |

| • Prompt engineering, LangChain | • Data augmentation (Albumentations) | • Monitoring (Prometheus, Grafana) |

| • SpaCy, NLTK, Hugging Face ■ | • OpenCV, Pillow | • Automated testing (pytest) |

| **Programming** | **Data Engineering** | **Cloud & Dev Tools** |

| • Python (3.9■3.11) • PyTorch • TensorFlow | • Spark, Pandas, Dask | • AWS (SageMaker, EKS, S3) |

| • SQL, PostgreSQL, MongoDB | • Airflow, Prefect | • Terraform, Helm |

| • Git, GitLab CI | • Kafka, Redis | • Docker Compose, MLflow |

•

Selected Projects

| Year | Project | Core Skills | Impact Metric |

|---|---|---|---|

| **2025** | **Route Optimization Service** | Graph algorithms, API development, Kubernetes | Reduced average route distance by **14 %** |

| **2024** | **Predictive Maintenance for Assembly Lines** | Time■series forecasting, MLOps, SageMaker | Increased MTBF (Mean Time Between Failures) by **27 %** |

| **2024** | **Sentiment■aware Chatbot for Customer Support** | NLP, dialogue management, LangChain | Cut ticket backlog by **43 %** |

| **2023** | **Legal Contract Review Bot** | NLP, RAG, FAISS | Delivered query answers in **<1 s** turnaround |

| **2022** | **Real■Estate Document Analyzer – Phase 2** | RAG, semantic search, Milvus | Brought search latency down to **<200 ms** |

| **2021** | **Product Recommendation Engine** | RAG, personalization, MLOps | Boosted CTR from **3.2 %** → **7.8 %** |

| **2020** | **Clinical Notes Summarizer** | NLP, summarization, CI/CD | Reduced average reading time by **62 %** |

| **2019** | **Image Quality Assurance Pipeline** | Computer vision, automation, Docker | Cut manual review time by **85 %** |

•

Experience

| **Freelance AI/ML Engineer** (Self■Employed) | Jan 2020 – Present |

|---|---|

| • Delivered 30+ end■to■end AI solutions across healthcare, real■estate, e■commerce, and manufacturing.
• Managed full project lifecycle: requirements gathering, data pipeline design, model selection, productionization, and post■deployment monitoring.
• Negotiated contracts, scoped work, and consistently met SLA (≤ 48 h turnaround for critical fixes). |

| **Key Achievements**
– Designed a reusable RAG framework (FAISS + LangChain) that cut new client onboarding time by **40 %**.
– Implemented automated CI/CD pipelines that reduced release cycle from weeks to **2 days**. |

| **Machine Learning Engineer** – HealthTech Solutions, Boston, MA | Jun 2018 – Dec 2019 |

|---|---|

| • Built a HIPAA■compliant pipeline for de■identifying clinical text using spaCy + BERT.
• Integrated model serving with AWS SageMaker and created monitoring dashboards (Prometheus + Grafana). |

| **Key Achievements**
– Achieved **99.2 %** de■identification accuracy, surpassing the regulatory threshold of 98 %. |

| **Data Scientist (Intern)** – VisionAI Labs, San Jose, CA | Summer 2017 |

|---|---|

| • Developed an image■classification prototype for defect detection using TensorFlow and EfficientNet.
• Conducted A/B testing of model versions with MLflow tracking. |

| **Key Achievements**
– Improved detection F1■score from **0.78** → **0.91** within two months. |

•

Education

• M.Sc. Computer Science (Specialization in Machine Learning)**

University of Illinois Urbana■Champaign, 2017 – 2019

• Thesis:* “Hybrid Retrieval■Augmented Generation for Low■Resource Clinical Summarization”

• B.Tech. Electrical Engineering**
Indian Institute of Technology, Madras, 2013 – 2017

•

Certifications

Year	Certification	Issuing Organization
2023	**AWS Certified Machine Learning – Specialty**	Amazon Web Services
2022	**TensorFlow Developer Certificate**	TensorFlow
2021	**Professional Machine Learning Engineer**	Google Cloud
2020	**Certified Kubernetes Administrator (CKA)**	CNCF
2019	**Deep Learning Specialization** (5■course)	Coursera – DeepLearning.AI
